

CATProjects Functionality Snapshot

LEAD MANAGEMENT		Optional Unless Estimating in Use
Lead Management	<ul style="list-style-type: none"> • Manage the potential client relationship and keep notes on every interface • Pre contract information required for estimating • Historical rates for different build types for estimate cross check and forecast • Conversion statistics and sales reports • Push tender set up details through to CATPlan (optional) 	
ESTIMATING		Optional
Start a New Estimate	<ul style="list-style-type: none"> • Start a new estimate by selecting the job and tender close date • Identify areas for the project if an area breakdown is required • Define the default margins to be used on the estimate for each category • Append an estimate from another job that is similar if relevant 	
Subcontractor Pricing	<ul style="list-style-type: none"> • If using CATPlan import your invited subcontractors price and tender submission otherwise add invited subcontractors for each trade • Add prices and tags as pricing comes in • Calculate your allowances using the worksheet • Identify which sub price to use and add it to the estimate 	
Estimate Build Up	<ul style="list-style-type: none"> • Build up your estimate by activity code, select an item from your price book, add a recipe or type the item manually – flexible • All costs are split into plant, materials, labour or subcontract which are summarised from your work sheet • Add a sticky note to any item 	
Summary and Margins	<ul style="list-style-type: none"> • Margin can be added as a line item, back spread pro-rata or a mixture of both, helpful on “open book” projects • Preview a summary of the work sheet for any code • Use a substitute client code when required to present their way 	
Estimate Options	<ul style="list-style-type: none"> • Add a series of options and potential cost adjustments to your estimate without affecting the base estimate 	
Present Tender	<ul style="list-style-type: none"> • Present your estimate in a professionally branded format and include any relevant attachments and selected options • Add a selection of pre written paragraphs to avoid typing • Select one of the many formats from lump sum to full detail 	
Schedule of Rates	<ul style="list-style-type: none"> • Set up and Present a Schedule of rates for scheduled projects • This forms the base for the Progress Claim for Scheduled Jobs 	
Module Admin	<ul style="list-style-type: none"> • Import supplier price books • Build a series of recipes for different functions • Auto text for quote presentation that is inserted or appended 	
CONFIRMED PROJECTS		Compulsory
Project Foundations	<ul style="list-style-type: none"> • Once a project is confirmed set up foundation info including personnel, client, contract, retentions, variation margin defaults internal coding & bonds • Send project set up information through to CATPlan (optional) 	
Project Budget	<ul style="list-style-type: none"> • When confirming a project the budget will be created from the estimate If using an alternative estimating system budget can be imported • Budget can be adjusted by transferring dollars between codes • The budget can be locked with secured unlock • Substitute the code for a client code if required for reporting 	

Project Cash Flow	<ul style="list-style-type: none"> Budget Cash Flow Forecast Cash Flow based on actuals Show forecast Cash Flow across all projects
Trade Letting	<ul style="list-style-type: none"> Pre letting minutes default from the master but can be modified at job level Let trades progressively and include a cover letter, subcontract agreement, pre-letting minutes and other attachments where relevant. Smart and quick. Use invited subcontractors or add a new one on the fly Subcontract agreements that can be generated, electronically signed, upon signing by the subcontractor a copy is sent to both parties plus it is added to CATProjects. No more download, upload, scan, email, follow up or filing. Takes less than 10 seconds per subcontract agreement.
Build Type Costs	<ul style="list-style-type: none"> Statistics for completed jobs for different build type showing average breakdown of costs and average unit of measure costs, great for forecasting.
CONTACT INFORMATION Compulsory	
Contacts Master	<ul style="list-style-type: none"> Centralised contacts database that feeds all modules plus email and accounts Performance rating function Add insurance details either from here or subcontractor set up Import contacts from an excel spreadsheet or csv file At a glance see what projects and contact is associated with
Project Specific Contacts	<ul style="list-style-type: none"> Select a company and contact from your master database Identify their role and trade on the current project (auto from trade letting) Limit suppliers to being project specific or turn off this function
Staff Contact Info	<ul style="list-style-type: none"> Staff can update their own phone, email, mobile, signature and password
CLIENT ADMIN Optional	
Communication	<ul style="list-style-type: none"> Written communication for the client including attachments Sent communication shows in your sent items of your email system Track written and verbal responses with the unique "drop zone" Use data dump templates to avoid repetition and typing Identify the potential time impact of a communication Communication is instantly scheduled with report content determined by you
Variations	<ul style="list-style-type: none"> Manage variations including tracking responses both verbal and written Variations are instantly scheduled and cross referenced with any associated documentation both incoming and outgoing. Variations are auto added to progress claims excluding variations in progress
Claim Set Up	<ul style="list-style-type: none"> Create the claim set up from the budget or type it in manually, margin can be back spread or shown as a line item.
Claim Preparation	<ul style="list-style-type: none"> The progress claim is in a percentage complete format that is compliant with both the CCA and SPA. A new occurrence is created for each claim It is simple and expedient to produce an accurate professional looking claim Once a claim is approved tick it as ready for invoice and disable for editing, this will notify accounts that a cover invoice is required. Schedule of Rates format for claims is also an option
Cover Invoice	<ul style="list-style-type: none"> Generate a cover invoice which is based on the approved claim Retention is automatically calculated based on the retention method selected and the CAP that has been added if relevant Email the approved claim with the cover invoice attached History is always available so job financial managers always have information

CONSULTANT ADMIN		Optional
Communication	<ul style="list-style-type: none"> • Manage and track RFI's and other communication with the consultants • Track written and verbal responses with the unique "drop zone" • Use data dump templates to avoid repetition and typing • Identify the potential time impact of a communication 	
Communication Schedule	<ul style="list-style-type: none"> • Communication is instantly scheduled against the job • Report schedule content is defined by you using the powerful filter panel 	
Group Notification	<ul style="list-style-type: none"> • Send a group notification to the consultant group for items like meetings 	
SUBCONTRACTOR ADMIN		Optional
Communication	<ul style="list-style-type: none"> • Manage and track subcontractor communication including auto schedules • Track written and verbal responses with the unique "drop zone" • Use data dump templates to avoid repetition and typing 	
Variations	<ul style="list-style-type: none"> • Track and manage subcontractor variations including forecasts • Update variations as they progress through the cycle • Process contra charges as early as possible • Cross reference with a client variation 	
Claim Set Up	<ul style="list-style-type: none"> • When you let a trade in Confirmed Projects most set up information is brought forward and then you can modify retentions, breakdown their price, add compliance documentation and insurance • Identify documentation that is required for payment 	
Progress Claims	<ul style="list-style-type: none"> • Percentage complete format that is compliant with both the CCA and SPA, simple and expedient to produce an accurate professional looking claim • Claim details and history are always available to project management staff so they always have the historical information they need • Claims including retentions are pushed into the accounting system once they have been approved electronically by two authorised signatories 	
Group Notification	<ul style="list-style-type: none"> • Send a group notification to the one or many subcontractors for generic items such as the roof shout, meeting notifications or timing of claims 	
Trade Letting Schedule	<ul style="list-style-type: none"> • On selection of start on site dates and lead times a schedule is generated including dates for latest award, tender close and final design. 	
INCOMING COMMUNICATION		Optional unless using Communication Modules
Incoming Communication	<ul style="list-style-type: none"> • This is the other side of outgoing communication, add the response here and link it to the relevant out-going communication and close the circuit • Add sticky notes to any record • Preview associated documentation • Find any document quickly utilising the powerful filter panel • Forward documents to Subcontractors with creation of a document transmittal that includes the original document as an attachment 	
SAFETY INDUCTIONS		Optional
On Line Safety Inductions	<ul style="list-style-type: none"> • Site Manager makes a Site Specific Video • Invite Subcontractors to the On Line Induction • All subcontractors site staff view the induction video in a time frame that suits them which enhances the safety message. Relevant verifications on place. • When a subcontractor arrives on site they will check-in at the site office and provide their induction number • The main contractor verifies the induction number and checks photo identification from their CATSafety Personal Profile 	

	<ul style="list-style-type: none"> If all is okay they are checked onto site, if not then they can do the induction again from a phone or a common PC At a glance how many have completed inductions, from what company & who Review Personal Safety Profile for any individual on site
PLANT AND EQUIPMENT Optional unless using Diary Module	
Add New Plant	<ul style="list-style-type: none"> Create your asset list including vehicle details Categorise each item and assign a starting location Add the daily charge rate (or not) for each item of plant
Transfer From Store	<ul style="list-style-type: none"> Out-going transfers are from the store (job no 2) whereas all project incoming transfers are done through daily site diaries Once an item is transferred to a job the job is charged at the day rate until the plant item is transferred of the job.
Plant Register	<ul style="list-style-type: none"> Track and update compliance including vehicle registration Locate an item of plant within seconds Generate a plant register for each project or for all projects Run the store as a separate department or cost centre and manage recovery A great range of reports from vehicle registers, to compliance records, to plant costs and plant recovery, you can even store a photo If relevant the "Yard" can be its own cost / profit centre
Personal Equipment	<ul style="list-style-type: none"> Track personal issue equipment such as phones, swipe cards and PPE
SITE DIARY Optional	
Site Diary Type 1 or	<ul style="list-style-type: none"> Major Project Diary – traditional main contractor diary that records weather, dates, general diary notes, subcontractors on site, inspections, rain affected trades, visitors plant movement, daily checklist and todays delays
Site Diary Type 2 or	<ul style="list-style-type: none"> Major Project Diary – traditional subcontractor diary that records weather, personnel, general diary notes, variations, visitors, plant movement, modifiable daily checklist and todays delays
Site Diary Type 3	<ul style="list-style-type: none"> Small Job Diary – a company diary for the day and is not structured. Record the date, job no, author, free entry text and plant movement.
Site Diary Type 4	<ul style="list-style-type: none"> Designed for the Civil Contractor who wants to micro manage plant.
Site Photos	<ul style="list-style-type: none"> Drag and drop one or many photo's into the photo filing system and gallery
OPERATIONS Optional	
File Notes	<ul style="list-style-type: none"> File notes on the fly to replace scrappy notes and post its
Meeting Minutes	<ul style="list-style-type: none"> Progressive meeting minutes that allow consolidation of a meeting type on any particular project, save hours of work if back tracking information One click send to all participants and apologies
Check Sheets	<ul style="list-style-type: none"> Create check sheets based on check sheet templates you have set up for things like safety, inspections or action lists
Completion Compliance	<ul style="list-style-type: none"> Completion and consent items that require action

Project Related	<ul style="list-style-type: none"> Photo Filing Structure, Monthly Report Categories and Estimating Defaults

Web Based - CATProjects is entirely web based and there is no requirement for software on your local PC. This heavily reduces IT costs and removes the need for your own remote server infrastructure. The operations team can instantly access your job management software from any location at any time.

Accounting Interface - Currently there is a free accounting interface to both MoneyWorks and Xero. We will consider API's for other accounting systems that are suitable for the construction industry however this is on a pay for basis.

Payroll Interface - Currently there is a free payroll interface to iPayroll, Cloud Payroll, Flexitime and Xero. We will consider API's for other payroll systems that are suitable however this is on a pay for basis.

Devices - CATProjects is suitable for use on any computing device with internet access which is 10 inch or bigger. The Microsoft Surface is the ideal mobile device. There is a mobile web app for smart phones which has limited functionality and includes; Time Sheets, File Notes, Contacts Lookup and Photos.

CATPlan – There is an interface between CATPlan and CATProjects for tender invitations, job set up, job confirmation and posting of documents created on CATProjects through to CATPlan where relevant.

CATSafety – There is an interface between CATProjects and CATSafety so that all subcontractor induction information can be monitored.
